POSTER No. 12

Georgia State College of Agriculture

EXTENSION DIVISION

BE WARNED

Unusual Conditions Exist in Georgia

Not only does the Boll Weevil threaten to destroy the cotton crop, but war conditions demand the production of more food stuffs

IT IS NOT YET TOO LATE TO REPLAN FOR SAFETY

The price of feed stuffs has advanced faster than the price of cotton. War conditions are causing still greater advances. Make sure of next year's supply with a surplus for sale while there is time.

The Purchasing Power of a Bale of Cotton Has Not Increased

NOTE THE FIGURES BELOW

"Unless the South grows food crops in abundance---in greater quantities than this section has grown at any time in its history, the South faces starvation." --- Assistant Secretary of Agriculture Vrooman.

Retail Equivalent Values of a Bale of Cotton

Conditions Before War
In an average year with 12c.
cotton, a \$60.00 Bale
